

MEGAYIELD GOLD

MEGAYIELD GOLD is an expertly crafted mixture of Vitamins, minerals, plant hormones and plant extracts that are designed to accelerate shoot growth, which in turn **BOOSTS** plant growth rates. It also acts as a growth stimulant that protects the plants from the effects of stress. **Megayield Gold** is designed for use in all stages of plant growth, from clones to fully mature plants. **Megayield Gold** can be used on hydroponic and soil grown plants.

ADAPTATIONS:

CLONES : **Megayield Gold** increases the strike rate of clones by reducing the stress simply by providing the all the vitamins and hormones to the clone before the sprout roots.

EARLY VEGATATIVE GROWTH : A growth surge will occur in this phase from using **Megayiled Gold**, this occurs because **Megayiled Gold** simulates very healthy soil which promotes strong healthy growth in plants.

SEMI MATURE : Adolescent plants turning to flower will slow their metabolic rates and produces less of their compounds, the plant will then depend on a strong supplement that is balanced and highly nutritious to give the plant a strong foundation for high yields. **Megayield Gold** is that supplement!

FULLY FLOWERING : In this phase the flowering plant loses roots and concentrates on flowering, **Megayield Gold** stimulates root growth which will maintain the plants vigour throughout its cycle to produce highest yields ever.

HOW TO USE : Use 1ml per litre of water as a standard rate. For the best results, use at every solution change. For **CLONES** use half the standard rate and soak the rooting medium through.

SHAKE VIGOROUSLY BEFORE USE
